

Project Development Manager for offshore wind projects

Would you like to join one of the most ambitious offshore wind farm projects in the world?

Join us and become Project Development Manager in our Project Development APAC department which is responsible for developing and maturing one or more Offshore Wind projects in Taiwan and APAC, from early maturation stages through wind farm construction until transfer to operations.

Reporting to the Head of Project Development APAC, this new Project Development Manager position will, in cooperation with the Regional Head of Project Development, be responsible for developing and maturing one or more Offshore Wind projects in the Taiwan region. As each project matures through its lifecycle key responsibilities will include;

Your key tasks will be to

- Overall responsibility for the development of Taiwan's project portfolio encompassing every stage from feasibility to bid submission
- Lead the project(s) which could include up to 60 people depending upon the projects scope and phase
- Coordinate with and influence internal stakeholders across geographies and functions to deliver tasks as required for successful project delivery
- Manage external stakeholder groups across government, partners and investors to maximize engagement and cooperation
- Steer and coordinate the business through relevant project steps including but will not be limited to permitting, feasibility studies, technical investigation and business case writing
- Ensure delivery of sufficient overview of economic feasibility of most attractive cases and where relevant, alternatives.
- Secure grid, consent and regulatory framework

The Project Development Manager is a key position in our Taiwan focused team both in country and as part of the wider organization. The position will be critical to delivering project success and so we are seeking to identify a talented and experienced Project Management professional.

Your qualifications and core competences include that you

- Strong Regulatory and Industry network in Taiwan
- Extensive Project Management experience gained working on large infrastructure projects or similar in Taiwan
- Excellent communication skills with a demonstrable track record of working across internal and external stakeholder groups
- Ability to lead projects and navigate in a strong international matrix organization
- Commercial and financial acumen
- Fluent in Mandarin and English communication proficiency
- PMI qualifications are desirable but not essential

You will be based at our Taiwan office in Taipei on local terms and conditions.

The successful applicant will as part of the onboarding process, initially be assigned a role as Deputy Project Manager on a specific development project in the Taiwan region.

Moreover, you have the ability to see the bigger picture at all times, yet you understand the importance of details. You can handle numerous tasks simultaneously without losing perspective, and you thrive in a job in a fast moving, multi-cultural project organisation.

We offer

A unique and challenging job where you have every opportunity to develop your skills, when you lead and develop some of the world's largest offshore wind projects.

In Ørsted, we have a high level of expertise and many complex and challenging work tasks. We work goal-oriented and efficiently with some of the world's largest offshore wind projects, and we are committed to reducing the cost of electricity.

About Ørsted

Headquartered in Denmark, Ørsted's 5,600 employees develop, construct and operate offshore wind farms, bioenergy plants and innovative waste-to-energy solutions and provide smart energy products to its customers. Ørsted Wind Power's 2,300 dedicated employees have developed and constructed the largest portfolio of offshore wind farms in Northern Europe, and we're expanding with international activities in the US and Asia-Pacific.
